<i>Foreword by Thomas Piketty: Earth Capital: Long Live Eco-History!</i>	ix
Introduction	i
Earth capital	2
When does the future begin?	5
Thinking about time, appropriating the future: a global perspective	6
 Part I: Green Growth and Forced Labour, 12th–19th Century	 17
1 Indispensable Labour, Forced Labour	19
Too many people?	19
Where's the capital?	24
One law for the masters	28
Global economic growth	31
2 Energy Resources in Preindustrial Economies	36
Wood and coal	36
Wind and seawater	37
Rivers like no others	40
Animal and human power	43
3 Crops and Material Culture	50
Wheat: the wrong right answer	51
Hybridization, or perhaps not: pasta	56
Many rice varieties, not just in Asia	61
Afro-American maize	69
'Noble' cane: our sweet tooth, a rod for their backs	71

4 A Dangerous Mix: Environment, Institutions and Inequality	76
The Little Ice Age and the collapse of agrarian empires	76
Shortages and famines: caused by climate and/or the market?	79
The price is right! Regulating markets	82
Meat: a scarce food	86
Conclusion: Why Europe? The Power of Violence and Constraint	89
 Part II: The Productivist Regime and the Great Acceleration, 1870–1970	 95
5 The Age of Capital	97
The architecture of competition	97
What modernization of agriculture really means	103
Creative destruction? Chemicals in food production	108
Smog in the Global North, flogging in the South: a new energy equilibrium	110
6 Seeds, Plants and Genetics	119
Hybrid maize: miraculous yields and economic dependence	126
Rice and floods	129
Wheat: standardization at the expense of nutrition	135
Conclusion	141
7 Transmissible Diseases and Food: Meat	143
Meat for all, but at what cost?	143
Swine trichinosis: protectionism or health crisis?	147
An epidemic without borders: bovine tuberculosis	152
Conclusion: epizootic to zoonotic, the pendulum swings	154
8 Capital, Neocolonialism and Famine	158
Capital and markets: <i>allegro ma non troppo</i>	158
The <i>nouveaux riches</i> and permanent outsiders	162
Colonial famines	166
Conclusion	174

Part III: From the 1970s to 2050: High Globalization, Collapse and Tomorrow's World	177
9 Neoliberalism and the Euphoria of Speculation	179
<i>Das Kapital</i> moves South	193
Energy sources in the age of globalization	199
Ever-increasing yields: the end of illusions	206
10 Hunting for Seed Varieties vs. Genetic Selection	210
From hybrids to GMOs	219
Breeding wipes out everything in its path	224
Why can't we live without meat?	229
The boomerang effect: mad cow disease, avian flu and COVID	232
Babette's feast	240
11 Towards the World of Tomorrow	247
An ideal past?	247
Choose the right objectives	251
Green taxation vs. inequalities	256
Should we abandon capitalism?	261
Put an end to speculation	263
Seeds and intellectual property: breaking the link	266
Restoring the centrality of labour	272
Conclusion: Just Institutions vs. Just Societies	277
<i>Notes</i>	290
