Government Certifications and Accreditations

Validating NETSCOUT Products and Platforms for the Public Sector

Partnerships and Technology Alliances

Assuring Quality and Reliability for Streamlined Procurement

At NETSCOUT, we have a long, trusted history of working with government agencies to provide powerful, robust solutions that enable network visibility for the most demanding environments.

Our commitment to certification testing ensures our flagship products meet the high standards of security and reliability required for agency procurement pathways and partners.

Relevant Programs, Agencies, and Approved Product Lists

Federal Information Processing Standards (FIPS)

Developed by the National Institute of Standards and Technology for use in computer systems by American government agencies and contractors for a variety of purposes including computer security and interoperability.

[Learn More](#) →

DoDIN Approved Products

The consolidated list of products that have completed Cybersecurity and Interoperability certification in alignment with The Department of Defense.

[Learn More →](#)

Continuous Diagnostics and Mitigation

Products that have undergone Department of Homeland Security (DHS) and Cybersecurity and Infrastructure Security Agency (CISA) product qualifications.

[Learn More →](#)

Common Criteria

Created primarily to ensure that evaluations of IT products and protection profiles are performed to high and consistent standards and are seen to contribute significantly to confidence in the security of those products and profiles.
